

ceramic solutions

Ceramic Solutions (Aust) Pty Ltd was commenced in August 1994 to carry out its core business of supplying and installing ceramic tiles for commercial and industrial projects, with a particular focus on sport and leisure applications.

Ceramic Solution's distinctive competencies include design development, specialist applications and tile failure repairs. Ceramic Solutions specializes in tile applications for Olympic compliant swimming pools, leisure pools, wave pools, hydrotherapy pools, pool concourses, steam rooms, saunas and change rooms.

Oliver and Mark Huss have a wealth of directly relevant industry experience and a broad network, having spent a combined 30 years in their industry. The company is well known for providing technical support to architects and clients direct during the design development phase of a project and to builders during the installation phase of a project.
